# SAHIL CHAUDHARY

sahil.techwork@gmail.com ◇ New Delhi, India ◇ linkedin.com/in/sahilchaudhary17

## SUMMARY

Full-stack engineer building scalable web applications with Angular, React, and TypeScript, focused on automating workflows and delivering measurable improvements in efficiency and system performance.

## PROFESSIONAL EXPERIENCE

**Infosys Limited - *Specialist Programmer*** Aug 2025 - Present

- Developed a scalable frontend using Angular and TypeScript, ensuring modular architecture, reusable components, and responsive UI
- Designed and built an admin dashboard for client to automate manual workflows, reducing operational effort through intuitive UI driven controls

## PROJECTS

**ResuMate - *Full Stack Developer*** [Live] Dec 2023 - Apr 2024

- Achieved 600 unique user engagements and 2300 page visits by creating a professional resume-building platform with predefined formats using React and JavaScript following agile methodology.
- Enhanced data security and the user experience for over 200 returning users by implementing secure local storage with JavaScript for saving previously filled columns.
- Attained a 60% engagement rate by designing a user-friendly interface with Figma and an SEO score 100 on Google Analytics, Page-Speed Insights.

**Complaint Desk - *Full Stack Developer*** [Live] Mar 2024 - Apr 2024

- Minimized paperwork by 99% through developing a high-efficiency complaint administration platform using React, Node.js, and Express.js for performing CRUD operations and managing user profiles.
- Reduced the time required to manually document and access complaints from an hour to 2-3 minutes by utilizing MongoDB for efficient data storage and implemented microservices architecture scoring 98 for Performance on Google Page-Speed Insights.

**SignScribe - *Machine Learning Engineer*** Oct 2023 - Feb 2024

- Developed a machine learning model for sign language detection using YOLO and TensorFlow, enabling the translation of more than 10 ASL signs into text with 91% accuracy.
- Engineered a real-time sign language detection interface using Flask, integrating the Google Gemini API for multilingual translation to over 100 languages.

## SKILLS

| | |
|---|---|
| **Programming Languages** | Typescript, C++, Python, SQL |
| **Frameworks/Tools** | React.js, Angular MongoDB, Azure DevOps Figma, Tableau, Jira, Git |
| **Relevant Coursework** | Object-oriented programming, Database management system, Operating system |
| **Certifications** | Infosys AI Professional, AWS Cloud Practitioner, SQL (Intermediate) |

## EDUCATION

**Vellore Institute of Technology** Bhopal, India

B.Tech - Computer Science and Engineering, Cumulative GPA: 9.18 May 2025

## EXTRACURRICULAR ACTIVITIES

**Achievements & Responsibilty**

- Won the Ideathon in Feb 2024, achieving first place among 25 teams, by presenting the ResuMate project.
- Reached final stage in Hack Data, a 24-hour hackathon by ACM Delhi, competing against 500 teams.
- Led Student council and a large Organizing Committee for the Annual Techno-cultural Fest, attracting over 11K attendees and managing logistics for over 90 events hosted by college clubs.
- Volunteered for the National Service Scheme unit, contributing to 4 community service initiatives.
